🎓 Software Engineering Student | INSAT (National Institute of Applied Sciences and Technology)

Profile

Motivated and curious software engineering student with a foundation in programming, web development, and embedded systems. Currently pursuing studies at INSAT, combining academic learning with practical experience in software design, problem solving, and project work. Eager to apply technical knowledge and creativity in real-world environments.

Education

National Institute of Applied Sciences and Technology (INSAT) – Tunis, Tunisia

Software Engineering Degree (in progress) 2025 – Present

(Currently in the 2nd year of the preparatory cycle – GL2)

Lycée Pilote Ariana (LPA) – Ariana, Tunisia

Baccalaureate in Mathematics 2024

Collège Pilote Lac2 (CPBL) 2017 – 2020

Technical Skills

Programming: Python, C++, C, JavaScript, Embedded C, Java

Web Development: HTML, CSS, MySQL, Flask, SQLAlchemy, Spring Boot

Systems: Linux, socket programming, Git, embedded systems, Arduino

Languages: Arabic (native), French (fluent), English (fluent), Spanish (A2)

Experience

Intern – GREPSYS (*1 month, self-learning internship*) 2025

- Developed a website as a learning project using **HTML, CSS, and JavaScript**.
- Explored **database management (MySQL, SQLAlchemy)** and **Flask web framework**.
- Strengthened front-end and back-end web development foundations.

Projects & Competitions

- **Fundamental of Deep Learning Certified Workshop – IEEE INSAT CS & NVIDIA (2026)**
Obtained a certificate granted by NVIDIA upon completing a hands-on workshop about the fundamentals of Deep Learning.

- **Pharmacy Management App – University project (2026)**
Developed a pharmacy management application in Java as part of a university project, focusing on data management and user interaction.
- **Network Socket-Based Systems – University project (2026)**
Developed client-server applications in C on Linux. Implemented TCP/UDP communication and a basic HTTP client. Built a multi-client server using concurrent handling techniques.
- **Sports Tournament Manager – University project (2026)**
Produced a full UML model including use case diagrams, class diagrams, sequence diagrams, and activity diagrams to specify system behaviour and architecture.
- **Robolympix Competition – Aerobotix (2026)**
Built an autonomous maze-solving robot for the Robolympix competition, learning PID control and robot parameter tuning through iterative testing and navigation challenges.
- **SmartLife Full-Stack Home Services Platform – University project (2026)**
Designed and developed a multi-service residential management platform with a Spring Boot REST API and two frontend interfaces for residents and operators. Implemented modules for home incident reporting and resolution, delivery workflow tracking and package and mail notifications.
- **ERP Web Project – University project (2026)**
Designed and developed an ERP-style website focused on centralized business management, implementing backend logic, database operations, and dynamic frontend interfaces.
- **Robocup ENSI Competition – Aerobotix (2025)**
Had the opportunity to participate in RoboCup ENSI with Aerobotix, working on the design and implementation of a téléguidé tout terrain robot. A great hands-on experience that strengthened my teamwork and problem-solving skills.
- **Code Quest – ACM (2025)**
Took part in Code Quest, a competitive programming event organized by ACM, focusing on logic, collaboration, and efficient problem-solving.
- **IEEE Xtreme (2024 & 2025) – IEEE INSAT CS Chapter**
Participated in the international 24-hour programming competition for two consecutive years. Developed teamwork, time management, and advanced problem-solving skills through real-time coding challenges.
- **Embedded C Workshops – IEEE INSAT RAS & CSF (2025)**
Completed a certified series of workshops focused on microcontroller programming and embedded systems design.
- **Tunisian Olympiad in Programming (2022)**
Advanced through the first two preliminary rounds. Discontinued before the final stage due to limited experience in C++ at the time.
- **Co-Think Entrepreneurship Program (2018)**
Participated in a one-month training focused on innovation and entrepreneurship. Presented a project idea before a jury and received recognition for *Best Presentation*.

Activities & Interests

- Member of IEEE INSAT Student Branch, Aerobotix INSAT, ACM and GDG
- Interested in software development, embedded systems, and innovation
- Enjoys design, teamwork projects, and learning new technologies

Soft Skills

Teamwork - Adaptability - Creativity - Fast Learner - Problem Solving
