

Yasmine Bouziri

+216 29 704 059 — ysbouziri@gmail.com — yasmine.bouziri@insat.ucar.tn — Tunis, Tunisia

Profile

Software engineering student with hands-on experience in full-stack development, systems programming, and embedded systems. Interested in building practical software systems combining backend development, networking, and robotics.

Education

INSAT – National Institute of Applied Sciences and Technology	2025 – Present
<i>Software Engineering Degree (Preparatory Cycle – GL2)</i>	<i>Tunis, Tunisia</i>
Lycée Pilote Ariana	2024
<i>Baccalaureate in Mathematics</i>	<i>Ariana, Tunisia</i>

Technical Skills

Languages	Python, C, C++, Java, JavaScript, Embedded C
Web & Backend	HTML, CSS, Flask, Spring Boot, MySQL, SQLAlchemy
Systems	Linux, socket programming, Git, embedded systems, Arduino
Languages	Arabic (native), French (fluent), English (fluent), Spanish (A2)

Experience

Web Development Intern – GREPSYS	2025
<i>Full-stack web development internship</i>	<i>Tunis, Tunisia</i>
• Built a full web application using HTML, CSS, JavaScript, Flask, and MySQL. • Worked on backend logic and database integration using SQLAlchemy.	
Logistics Staff – NRTF	2025
<i>Event organization support</i>	<i>Tunisia</i>
• Assisted in event logistics and on-site coordination. • Supported setup operations and participant management.	

Projects

SmartLife – Full-Stack Home Services Platform	2026
• Built a Spring Boot REST API with two web interfaces (clients and operators). • Implemented modules for incident reporting, delivery tracking, and notifications.	
Network Programming – Socket-Based Systems	2026
• Developed client-server applications in C on Linux. • Implemented TCP/UDP communication and a basic HTTP client. • Built a multi-client server using concurrent handling techniques.	
Sports Tournament Manager – UML Conception Project	2026
• Led the software design phase of a web application for managing sports tournaments. • Produced a full UML model including use case diagrams, class diagrams, sequence diagrams, and activity diagrams to specify system behaviour and architecture.	
ERP Web Application	2026
• Developed a web-based ERP system with database integration and dynamic UI.	
Pharmacy Management System (Java)	2026
• Built a Java application for managing pharmacy data and operations.	

Certifications & Competitions

- Fundamentals of Deep Learning – NVIDIA (2026)
- Robolympix – Autonomous maze-solving robot with PID control (2026)
- RoboCup ENSI – Designed and built a mobile robot (2025)
- IEEE Xtreme – 24h programming competition (2024, 2025)
- Embedded C Workshops – IEEE INSAT RAS & CSF (2025)
- Code Quest – ACM competitive programming event (2025)
- Tunisian Olympiad in Programming – advanced to round 2 (2022)

Activities

IEEE INSAT Student Branch, Aerobotix, ACM, GDG

Soft Skills

Teamwork — Adaptability — Problem Solving — Fast Learning
